

SODIQ ARDIANTO WIJAYA KUSUMA

Software Engineer

Poris Jaya, Tangerang | +62838 6583 6382 | sodiqardianto@gmail.com

SUMMARY

Software Engineer with 4+ years of experience in full-stack web and mobile application development. Skilled in Laravel, Next.js, CodeIgniter, Flutter, Express.js, REST API integration, database management, deployment, and Git-based collaboration. Currently working at Bethsaida Hospitals, developing mobile applications and AI-powered chat solutions using RAG architecture and LangGraph. Strong in problem-solving, system analysis, feature implementation, and delivering scalable solutions aligned with business and operational needs.

EXPERIENCE

BETHSAIDA HOSPITALS –South Tangerang, Indonesian

Fullstack Mobile Developer (November 2025 – Present)

- Developed and maintained mobile applications using Flutter for hospital digital services.
- Designed and implemented an AI-powered chat application using RAG architecture powered by LangGraph.
- Integrated mobile applications with backend services and APIs to support hospital operational needs.
- Collaborated with internal teams to analyze requirements, develop features, test functionality, and improve application reliability.
- Supported deployment and application maintenance to ensure stable usage in a production environment.

PARAMADINA UNIVERSITY –East Jakarta, Indonesian

Software Engineer (August 2022 – November 2025)

- Developed and maintained internal web applications using Laravel and Next.js.
- Built and improved modules for academic, admission, and finance-related university operations.
- Participated in feature planning, implementation, testing, and issue resolution.
- Collaborated with cross-functional teams to gather requirements and deliver system improvements.
- Managed application updates, bug fixes, and deployment activities based on established project plans.

PT PETRA SEJAHTERA ABADI –South Tangerang, Indonesian

Web Developer (September 2021 – June 2023)

- Built internal company websites using PHP and CodeIgniter 3.
- Developed an HR Recruitment application to help HR and users track recruitment progress.
- Created an Engineering Utility application to record ongoing engineering processes and reduce manual paper-based reporting.
- Coordinated with users from multiple divisions to gather requirements and improve internal workflows.
- Assisted with internal server configuration, deployment, and GitHub-based source code management.

EDUCATION

RAHARJA UNIVERSITY (2015 - 2020)

Bachelor’s degree in informatics engineering – GPA: 3.35

CERTIFICATIONS

- Full stack Laravel Vue.js, Provided by Buildwithangga
- Full stack Designer, Provided by Buildwithangga
- Alibaba Cloud Elastic Compute Service, Provided by Codepolitan
- Fundamentals of Back-End Application Development & JavaScript Programming, Provided by Dicoding Indonesia
